Call for Engineering Mentors

SENIORS AND JUNIORS in The College of Engineering would you like to a chance to make a positive impression on Freshmen Engineers? This past spring, 160 EF 152 students have asked for A PEER MENTOR! This is huge! Imagine being a resource that is able to give straight forward Engineering Mindset answers to students in the early part of their Engineering Careers. This is your chance to be a part of that channel!

We are in search of students that can be mentors or liaisons with their respective departments. The questionnaire for mentors is at the bottom. If you have any questions comments or request more information please contact:

• First Meeting will be at 4:00 PM September 15th Monday and 16th Tuesday @ in Room 503 of the John D. Tickle Engineering Building (I will be there from 3:30 earlier if need be and only attend one meeting).

Have you ever wanted to give advice to Engineering Freshmen?
• Tell them what to expect, while being able to learn from them about new trends.
• This program is there to help setup a channel where you can tell your mentee what to expect. Give awesome tips and tricks on how to deal with the specific discipline.
• You will get a mentee specific to your major.
• You can forge a relationship with the students that will deal with the same scenarios you dealt with!

Would you be willing to become a PEER MENTOR?
• You would be allocated Peer Mentee(s) wanting to join your Discipline.
• This does not mean you have to help them on their EF homework, or teach them physics.
• You do not have to spend more than an hour every 2-4 weeks.
• You can be the first students to do this and start the program.

More Info contact: Shivam Zaveri szaveri@utk.edu
