### Upper-Division Status

Provisional Status

Students who have completed CBE 201, CBE 235, CBE 240, and CBE 250 with an overall GPA of at least 2.3 or 2.0 in at least one course must apply for provisional status in the semester following the completion of CBE 250. Any student granted provisional status must retake the 200 level CBE course in which a grade less than C was earned and achieve a C or better to be admitted to full upper-division status. Grades of C or better in these three courses are required for graduation. The granting of provisional upper-division status is based on availability of space in the departmental programs after upper-division status students have been accommodated. Provisional students are required to demonstrate the ability to perform satisfactorily in upper-division courses by completing a total of seven departmental courses with a grade of C or better in each course (including the four required for upper-division status). Permission to continue with upper-division classes depends on this minimum level of performance.

Any student with an overall GPA below 2.3 will not be admitted to upper-division chemical and biomolecular engineering courses. Students who have not been admitted to upper-division or provisional status will be dropped from upper-division departmental classes.

**Term 1**

- Math 130 or higher or one SS or one AH or one CC

**Term 2**

- Math 130 or higher

**Term 3**

- EF 151/157 or Physics 135/137

**Term 4**

- EF 152/158 or Physics 136/138

**Term 5**

- ME 202 or CS 102 or MSE 201 or CBE 201

**Term 6 through 8**

- No Milestones
