Hey everyone,

This is just an overview of what we covered last meeting on October 9 before we voted on new TBP recruits. There will be a tour of the Siemens facility today (October 16). It is at 5:30 PM and everyone will just meet at Siemens.

Our Service Chair, Katie Lutz, told everyone about Boo at the Zoo. This will happen on October 18 and will be a great opportunity for service hours. She also mentioned that this is breast cancer and domestic violence awareness month. One of the ways people can get involved is to remind loved ones to get a mammogram and bring in old cell phones to the next TBP meeting. Katie will donate these phones to the YWCA and they will be put to good use.

Our Mindset Chair, Trevor Grieco, talked about a great volunteering opportunity with Holston Middle School. It will involve building bridges out of Popsicle sticks to increase enthusiasm in science among the youth. This will be on October 17 from 1:00 - 3:30 PM and Trevor will send out further emails with more details.

The 100th anniversary of Engineer's Day will be on October 25. There will be an engineering expo there and tons of opportunity for us to complete those service hours. An email has already been sent out requesting volunteers for Engineer's Day festivities.

Sincerely,

Dmitri Falkner
